Your Friendly Dosing System

ADoST

ADoST brand of adhesive dosing systems are carefully designed and manufactured to increase efficiency, reduce waste and enhance safety. Conceptualized after extensive end user collaboration, ADoST's smart and ergonomical design stands out for maximum efficiency and comfort.

Our dispensing equipment are designed to appeal universally to every manufacturer who cares about waste generation, precision dispensing and high application cost of manual dispensing.

ADoST Accessories

ADoST accessories are designed to make the use of ADoST machines easy and efficient for our users, although they are not supplied as our standard offering with the machines and needs to be procured separately.

ADoST Pinch Valve Stand

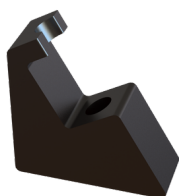

The ADoST Pinch Valve Stand is an essential accessory designed to provide stability and adjustable mounting arrangement of Valve for every adhesive dispensing applications.

ADoST Pen

ADoST Dispensing Pen is a precision tool designed for accurately applying adhesives such as anaerobic, cyanoacrylate, UV-curable, and two-component adhesives.

This pen accessory facilitates the precise and controlled dispensing of adhesives, ensuring optimal placement and consistency.

ADoST Pen Stand

The ADoST Pen Stand is a useful and well-organized accessory that keeps the ADoST Pen firmly in place and stops glue from curing at the nozzle tip when the pen is idle.

ADoST Pinch Tubes

The ADoST Pinch Tube is an integral component of the ADoST dispensing system, employed across diverse applications such as adhesives, sealants, and other fluids.

Luer Lock

Luer Lock forms a sealed connection between static mixers and nozzles to achieve controlled flow of adhesive and sealants.

Nozzles

Dispensing needle tips fit snugly on to the luer-lock and form a leak free connection. These nozzles or tips are available in various sizes to meet the requirements of precision dispensing in every bead size

Luer barb connector

The Luer barb connector is used along with ADoST Pen to complete the tubing connections while using ADoST pen with any of the CDS variants.

Static Mixer

A static mixer is precision engineering product used to combine two or more fluid materials of different viscosities into a homogenous mixture to achieve specific end use properties.
